Aims and Scope: International Journal of Plant Production (IJPP), a peer reviewed research journal, is published by Gorgan University of Agricultural Sciences and Natural Resources (GUASNR), Gorgan, Iran in yearly volumes of four issues. Special issues devoted to single topics are also published. IJPP publishes original research papers and invited review papers on agricultural and resource plants, their production and related subjects.

Papers with a background in soil science, meteorology, product process and post harvest management will be accepted provided that they are strongly related to plant production. Papers on plant molecular biology, plant biotechnology and genomics should indicate how their findings can be applied to problem solving in plant production. Papers should be original, unpublished and not being considered for publication elsewhere. Papers based on limited data or of local importance, and results from routine experiments will not normally be considered for publication.

Publishing plan: IJPP is published in yearly volumes of four issues on January, April, July and October.
