**Aims and Scope:** International Journal of Plant Production (IJPP), a peer reviewed research journal, is published by Gorgan University of Agricultural Sciences and Natural Resources (GUASNR) in yearly volumes of four issues. Special issues devoted to single topics are also published.

IJPP publishes original research papers and invited review papers related to plant production at the field, farm and landscape level on cultivated plants including *field crops and forages*. IJPP does not publish papers with a background in genetics and plant breeding, plant molecular biology, plant biotechnology, as well as soil science, meteorology, product process and post-harvest management unless they are strongly related to plant production under field conditions. Papers should be original, unpublished and not being considered for publication elsewhere. Papers based on limited data or of local importance, and results from routine experiments will not normally be considered for publication.

**Publishing plan:** IJPP is published in yearly volumes of four issues on January, April, July and October.
